Chen, Y. (2022, May 19). *Interview chat with my mother* [Interview chat].

<https://drive.google.com/file/d/1YtPzQLDjKf4MUeHyNGywj6GcXwKqlX-p/view?usp=sharing>.

This is the chat screenshot between my mother and I about the reason we moved from the first hometown to the second one. It seems the life in the first hometown is great enough, so the audience needs more information to learn about the move.

FreeCodeCamp.org. (2018, October 31). *Snake Game Python Tutorial*. Youtube. Retrieved May 21, 2022, from <https://www.youtube.com/watch?v=CD4qAhfFuLo>.

FreeCodeCamp.org is an organization that teaches coding on Youtube. They have 5.69 millions subscribers, and it is a huge, great platform. It teaches the snake game in this video, which is applied in the second little game of my Project. Even though this is in Python, the logic of the game is the same.

Hill, Jackson, J. J., Nagy, N., Nagy, G., Roberts, B. W., Lüdtke, O., & Trautwein, U. (2016).

Majoring in Selection, and Minor in Socialization: The Role of the College Experience in Goal Change Post-High School: Life Goals and College Majors. *Journal of Personality*, 84(2), 194–203. <https://doi.org/10.1111/jopy.12151>

Professor Hill is teaching Psychology at Carleton University. This passage talks about how college life affects teenagers' big decisions. It confirms why I chose to continue my study under the epidemic, and also why I had a double major.

I.R.A.M.O.R.E. (2016, May 5). *GitHub - iramore22/flappy_bird_processing*. GitHub. Retrieved May 21, 2022, from https://github.com/iramore22/flappy_bird_processing.

This project is the base prototype of my first little game inside the project. Flappy bird is the main idea in the little game. I apply the logic and some of its methods in the code to make a little game about TV remote control fighting between my brother and me.

Liu, & Helwig, C. C. (2020). Autonomy, Social Inequality, and Support in Chinese Urban and Rural Adolescents' Reasoning About the Chinese College Entrance Examination (Gaokao). *Journal of Adolescent Research*, 74355842091408–. <https://doi.org/10.1177/0743558420914082>.

This article analyzes the Chinese College Entrance Examination (Gaokao). Gaokao is an exam that decides whether you will go to college or not, so it is extremely important for all the Chinese students. At the same time, it brings plenty of pressure on them, since they only have a chance per year. Chinese High School Entrance Examination (Zhongkao) is also similar. I attended Zhongkao, and it made me realize that Gaokao is not what I want in the future. What I want is something that does not judge me only based on my performance on an examination. Thus, I did not attend Gaokao eventually. Instead, I took TOEFL, SAT, AP tests and attended extracurricular activities to make myself a better high school student and apply for some U.S. colleges in the end.

Qian. (2017). 1978 : liu xue gai bian ren sheng : Zhongguo gai ge kai fang shou pi fu Mei liu xue

sheng ji shi = Stories of the first post-reform Chinese students to study in the U.S. (Di 1 ban.). Sichuan ren min chu ban she.

This book talks about the studying experience in the U.S. as an international student from China in 1978. After learning something in the U.S., our ancestors helped China become a better place. Thousands of Chinese students were affected by this act, and I am also one of them. This book contains the reason why I pursue studying in another country right now: for better experience and education.

J.H.D.T.P. (n.d.). *Kids Fighting Over Tv Remote*. POND5. Retrieved May 20, 2022, from <https://www.pond5.com/stock-footage/item/454367-kids-fighting-over-tv-remote>.

It is a video about children (siblings) fighting over a TV remote control. Fighting for the TV remote is common among siblings, also among my brothers and me. It is also the main idea for my first game in the project.

The Coding Train. (2018, September 12). *Coding Challenge #115: Snake Game Redux*. Youtube. Retrieved May 21, 2022, from <https://www.youtube.com/watch?v=OMoVcohRgZA>.

The Coding Train is a Youtube channel that teaches a lot of knowledge or program of Processing. It is also a very huge and great platform that has 1.43 millions subscribers. This video talks about a snake game like the one from FreeCodeCamp.org. FreeCodeCamp.org helps me more on logic, while The Coding Train helps me more on Processing language.
